FREE RESOURCE — UK EDITION

5 AI Video Script Templates for UK Marketers

Ready-to-use frameworks for professionals, freelancers & agencies. Paste into Zebracat and generate a scroll-stopping video in minutes.

- 5 proven script structures
- Optimised for UK audiences
- Works with Zebracat AI
- No editing skills needed

BEFORE YOU START

How to Use These Templates

Each template is a fill-in-the-blank script structure tested for UK professional audiences.

STEP 1

Pick your template

Choose the script that matches your goal — social ad, case study, lead gen, LinkedIn, or tutorial. Each template is independent and ready to use on its own.

STEP 2

Fill in the brackets

Replace every **[PLACEHOLDER]** with your specific details: your product name, pain point, result, or audience. The more specific you are, the better the output.

STEP 3

Paste into Zebracat

Open Zebracat, select "Text to Video", paste your completed script, and choose a style. The AI generates unique visuals — no stock footage, no templates that look like everyone else's.

STEP 4

Select UK-native voice

In Zebracat's voiceover settings, choose a British accent. UK audiences respond far better to native accents — this alone significantly improves retention and ad performance.

What makes these templates work

- ✓ Each template opens with a **pattern interrupt** — the first 3 seconds determine whether the viewer keeps watching
- ✓ The **problem is stated before the solution** — audiences engage more when they feel understood, not sold to
- ✓ All CTAs are **low-friction** — "start free" or "see how it works" outperforms "buy now" for professional audiences
- ✓ Copy is written in **British English** — "video editor" not "videographer", "£" not "\$", "agency" not "shop"
- ✓ Every template is **platform-agnostic** — works on LinkedIn, YouTube Shorts, Instagram Reels, and TikTok

1

30-Second Social Ad

TikTok · Reels · YouTube Shorts

25-35 seconds

Best for: Promoting a product or service

SCRIPT FRAMEWORK — FILL IN THE BRACKETS

- HOOK (0-3S)** *"Are you still [doing painful thing the old way]?"*

Use a behaviour your audience recognises immediately. Make it slightly uncomfortable.
- PROBLEM (3-10S)** *"Most [target audience] spend [X hours/£X] every [week/month] on [pain point] — and the results still look generic."*

Name the cost: time or money. UK professionals respond to both.
- SOLUTION (10-22S)** *"[Product name] lets you [key benefit] in [timeframe]. [One differentiating feature]. [Second differentiating feature]."*

Three beats max. Lead with the outcome, not the feature.
- PROOF (22-28S)** *"[Number]+ [customers/businesses/agencies] are already using it to [result]."*

Use a real number. Vague claims lose UK audiences fast.
- CTA (28-33S)** *"[Link in bio / Visit [url]] to start free — no credit card needed."*

Low-friction CTA. Remove every possible barrier.

EXAMPLE — FILLED IN (MARKETING AGENCY)

- | | |
|----------|--|
| Hook | "Are you still spending your Sunday evenings editing client videos in Premiere Pro?" |
| Problem | "Most UK agencies spend 8-12 hours per video, and clients still complain it looks stock." |
| Solution | "Zebracat generates a fully unique, client-ready video from your script in under 2 minutes. No stock footage. British voiceovers. Brand kit built in." |
| Proof | "50,000+ creators and agencies are already using it to scale their output." |
| CTA | "Link in bio — start free today." |

Zebracat tip: Use "Cinematic Short" or "Fast-Paced Social" style for 30-second ads. Select a British English voiceover and choose "Auto Scene Split" — Zebracat will cut between unique AI-generated scenes to match each beat of the script automatically.

2

Client Case Study Video

LinkedIn · YouTube · Website

60–90 seconds

Best for: Agencies & freelancers showing results

SCRIPT FRAMEWORK — FILL IN THE BRACKETS

- CLIENT INTRO (0–8S)** *"[Client type/industry] came to us with a problem: [specific challenge they faced]."*
Name the industry, not the client if confidential. Specific beats generic every time.
- THE STAKES (8–18S)** *"They were [wasting X time/spending £X] with [old approach], and [negative outcome] was starting to hurt [metric]."*
Make the consequence real. Money lost or time wasted are most relatable.
- OUR APPROACH (18–45S)** *"We introduced [solution/tool/process]. [Step 1]. [Step 2]. [Step 3]. The whole workflow now takes [new timeframe]."*
Three steps max. Brevity signals competence.
- THE RESULT (45–65S)** *"[Client] went from [before metric] to [after metric] in [timeframe]. That's [X% improvement / £X saved]."*
Numbers close deals. If you don't have exact figures, use ranges.
- CTA (65–75S)** *"If you're facing the same challenge, [visit / DM / book a call at url] — we'll show you how we'd apply the same approach to your business."*

EXAMPLE — FILLED IN (VIDEO PRODUCTION AGENCY)

Client	"A UK e-commerce brand came to us needing 20 product videos per month — with a £500 production budget."
Stakes	"Traditional filming would have cost them £3,000 per video. They were falling behind competitors on social, and ad performance was dropping."
Approach	"We built a Zebracat-powered workflow: script in 10 minutes, AI video in 2, brand kit applied automatically. 20 videos delivered in 3 days."
Result	"Cost per video dropped from £3,000 to £18. ROAS on their ad campaigns improved by 34% within 6 weeks."
CTA	"Book a free 15-minute workflow audit at our website — link in bio."

Zebracat tip: For case study videos, use "Corporate Clean" or "Documentary" style. Upload your client's brand colours into Zebracat's Brand Kit before generating — the AI will apply them to every scene. Use the avatar feature if you want a professional talking-head segment without filming.

3

Lead Generation Video Ad

LinkedIn Ads · Meta Ads · YouTube Pre-Roll

45–60 seconds

Best for: Driving sign-ups, calls, or downloads

SCRIPT FRAMEWORK — FILL IN THE BRACKETS

- PATTERN BREAK (0–5S)** *"[Surprising statistic or counterintuitive statement about your industry]."*
Lead with data or a provocation. Avoid "Hi, I'm..." — you lose 70% of viewers in the first 3 seconds.
- QUALIFY (5–15S)** *"If you're a [specific role] at a [company type] in [location/sector], and you're dealing with [problem]..."*
Narrow the audience. The right person should feel directly addressed.
- PROMISE (15–30S)** *"We've helped [X companies/clients] achieve [specific outcome] without [common objection or painful trade-off]."*
- MECHANISM (30–48S)** *"Here's how it works: [Step 1], [Step 2], [Step 3]. Most clients see [early result] within [timeframe]."*
Name your process. A named process signals expertise and reduces perceived risk.
- CTA (48–58S)** *"Click below to [download / book / start] — it takes less than [2 minutes / 30 seconds]. [URL]"*
Give a time estimate. It reduces drop-off on the landing page significantly.

EXAMPLE — FILLED IN (SAAS / AI TOOL)

Pattern Break	"The average UK marketing team spends 14 hours a week creating video content. And most of it gets 200 views."
Qualify	"If you're a marketing manager or agency owner spending real budget on video that isn't converting..."
Promise	"We've helped 50,000+ creators produce scroll-stopping video content without hiring an editor or touching editing software."
Mechanism	"Paste your script. Choose a style. Zebracat generates unique AI visuals and a British voiceover in under 2 minutes. Export in any format."
CTA	"Click below to start free — no credit card, no editing skills required. Takes 90 seconds to set up."

Zebracat tip: For lead gen ads, generate 3 versions of the same script with different visual styles (e.g. Cinematic, Motion Graphics, Real-Footage blend) and A/B test them. Zebracat's True Generative AI means each version is visually distinct — no stock overlap between variants.

4

LinkedIn Thought Leadership Video

LinkedIn Feed · LinkedIn Newsletter

60–90 seconds

Best for: Building authority, attracting inbound leads

SCRIPT FRAMEWORK — FILL IN THE BRACKETS

- CONTROVERSY (0–6S)** *"[Common belief in your industry] is wrong. Here's what's actually happening."*
Take a position. Neutral content gets ignored on LinkedIn. Safe opinions generate no engagement.
- THE REALITY (6–25S)** *"Most [professionals in your field] are still [doing outdated approach] because [reason]. But in the past [12 months / 2 years], [shift that changed everything]."*
- THE INSIGHT (25–55S)** *"What the best [job title / company type] are doing instead: [Point 1]. [Point 2]. [Point 3]. The result? [Measurable or observable outcome]."*
Three points is the LinkedIn sweet spot. Each should be one sentence.
- TAKEAWAY (55–75S)** *"The single most important thing you can do this week: [specific, actionable step]."*
Make it implementable in under an hour. That's what gets saved and shared.
- SOFT CTA (75–85S)** *"I post [topic] content every [frequency]. Follow me for more — or drop a comment if you're seeing the same thing."*
Ask for engagement, not a sale. The conversion happens in the DMs.

EXAMPLE — FILLED IN (CONTENT STRATEGIST / AGENCY OWNER)

Controversy	"The 'post consistently' advice is killing UK freelancers. Here's what's actually working."
Reality	"Most freelancers are grinding out 5 posts a week with no strategy, burning out, and wondering why their pipeline is dry."
Insight	"The highest-earning freelancers I know post 2x per week. But every post has a hook that targets a specific pain point, a story that proves expertise, and a low-friction CTA. Volume means nothing without relevance."
Takeaway	"This week: pick your three best client results, turn each one into a 60-second video script, and generate all three in Zebracat in under 30 minutes."
Soft CTA	"Follow me for weekly content strategy breakdowns — or comment 'SCRIPTS' and I'll send you the framework I use."

Zebracat tip: For LinkedIn, choose the 1:1 square format or 4:5 portrait — they take up more screen space in the feed. Use a professional avatar voice with a British accent. Generate a custom thumbnail with your key stat overlaid — LinkedIn auto-plays but viewers click for context.

5

Tutorial / How-It-Works Video

YouTube · Website · Email

90-120 seconds

Best for: Reducing objections, onboarding, SEO

SCRIPT FRAMEWORK — FILL IN THE BRACKETS

- PROBLEM HOOK (0-8S)** *"If you've ever tried to [do difficult thing] and ended up [frustrating outcome], this is for you."*
- PROMISE (8-15S)** *"In the next [X minutes], I'll show you exactly how to [desired outcome] — even if [common objection or barrier]."*
Name the objection before they think it. Eliminates resistance upfront.
- STEP 1 (15-40S)** *"First, [action]. [What you see / what happens]. This is important because [reason it matters]."*
- STEP 2 (40-70S)** *"Next, [action]. Most people skip this step — don't. [Common mistake and why it fails]. Instead, [correct approach]."*
The "most people skip this" hook increases retention significantly.
- STEP 3 (70-95S)** *"Finally, [action]. In [timeframe], you'll have [specific deliverable]. Here's what the result looks like: [describe output]."*
- CTA (95-110S)** *"Try it yourself at [url] — it's free to start. If you found this useful, [subscribe / follow / share] for more."*

EXAMPLE — FILLED IN (ZEBRACAT TUTORIAL / AFFILIATE CONTENT)

Hook	"If you've ever spent 3 hours editing a video and ended up with something that looks like stock footage from 2014 — this is for you."
Promise	"In the next 90 seconds, I'll show you how to generate a fully unique, professional video from a text script — even if you've never used AI tools before."
Step 1	"First, paste your script into Zebracat's text field. You'll see it automatically split into scenes. This is important — each scene generates its own unique AI visual."
Step 2	"Next, choose your style and voice. Most people skip the voiceover selection — don't. Choose a UK-native British accent. It makes a significant difference to how the video lands with UK audiences."
Step 3	"Finally, hit generate. In about 2 minutes, you have a complete video with unique AI visuals, professional voiceover, and your brand colours applied."
CTA	"Try it free at zebracat.ai — link below. No credit card, no editing software, no prior experience needed."

Zebracat tip: Tutorial videos work well as "blog to video" repurposes. If you have a written how-to guide, paste the URL directly into Zebracat's URL-to-video feature — it extracts the key steps and builds the script automatically. Use the 16:9 format for YouTube SEO and embed on your website.

Ready to generate your first video?

Start free on Zebracat — no credit card, no editing skills, no stock footage.
